AsiaTitle

Bring concepts of money and banking to life with the student-oriented approach in Brandl's MONEY, BANKING, FINANCIAL MARKETS AND INSTITUTIONS, 2E. While other books discuss the macroeconomy at the conclusion in a confusing

blur of IS-LM and AS-AD models, this edition examines the macroeconomy early and clearly using only the AS-AD framework. The author places the Great Recession in proper historical context; then connects concepts with students' previous macroeconomic coursework. This thought-provoking approach carefully examines engaging topics, such as money markets and investments, including their economic foundations and the controversies within them. Students delve into topics other books gloss over, such as the globalization of financial markets, the disruption of technology to financial markets, and debates over consumer protection in financial markets.

## MONEY, ISLAMIC BANKS AND THE REAL ECONOMY, 2E

Abdul Ghafar Ismail, *Universiti Kebangsaan Malaysia*

© 2018, Paperback, 9789670357584

AsiaTitle

This book is intended to develop some important discourses on three important subjects, that is, money, Islamic banks and the real economy. The discussion on money will highlight the role of money as capital and medium of exchange. The discourse

on Islamic banks will focus on the management of Islamic banks' funds. Finally, the link between money, Islamic banks and the real economy will become the third discourse of this book. The contribution of the Islamic banking industry to the current economic order is based upon a renewed application of Islamic law (or the Shariah), in modern economic and financial transactions. These measures must be seen as integral to developing the Islamic ideals of society and economy, based on the Islamic principles of social justice and humanity.
